years of experience

850+

completed projects

Written

warranty on every job

Markets served

Iran (Tehran and Alborz) · Iraq (Karbala, Najaf, Basra, Erbil) · Kuwait · Oman · Bahrain · United Arab Emirates

About us

Ofogh Apadana Pasargad Co., trading as Asfaltbama, is a Tehran-based contractor specialised in asphalt paving and bituminous waterproofing, with more than 25 years of experience and over 850 completed projects.

We carry out the work with our own site team and equipment, from base preparation to the final surface and from roof preparation to the flood test. Every job is handed over with a written warranty.

We work directly for owners and as a specialist subcontractor for main contractors, following the project specification and the approvals required locally.

Core services

Asphalt paving

- Industrial yards, warehouses and loading areas
- Car parks, compounds and villa driveways
- Base preparation, prime and tack coats
- Binder and wearing courses with paver and tandem rollers
- Patching, milling and overlay; hot-poured crack sealing

Isogam membrane waterproofing

- Torch-applied modified bitumen membranes (APP), aluminium-foil faced
- Primer, fillets and upstands on parapets
- Lapped, heat-sealed seams
- Detailing around AC units, ducts, pipes and drains
- Flood test before handover

Bitumen roofing (hot bitumen and jute)

- Two full layers laid crosswise
- Blown bitumen for heat resistance
- Roofs, foundations, basements and wet areas
- Protection layer against sun and traffic
- Written warranty

Specified for hot climates

Bitumen grade

Harder or polymer-modified grades where the specification allows

Compaction

Rolling completed while the mix is hot; night work in summer

Roof finish

Reflective aluminium-foil membranes or a protection layer

Drainage

Falls and outlets checked before paving and roofing

How we work on projects abroad

01

Enquiry

Photos, drawings and approximate areas by email or WhatsApp.

02

Technical review

Scope, specification, climate, loads and drainage.

03

Written proposal

Method statement, thicknesses, materials, schedule and price.

04

Mobilisation

Our site team, with materials and equipment as agreed.

05

Execution and testing

Quality checks during the works; flood tests on roofs.

06

Handover

Records and a written warranty.

Quality and safety

- Compacted thickness and layer details written into the contract
- Surface preparation checked before every membrane and asphalt layer
- Flood test of roofs before handover
- Safe handling of hot bitumen; protective equipment on site

From our sites

Paving and compaction of a residential compound yard

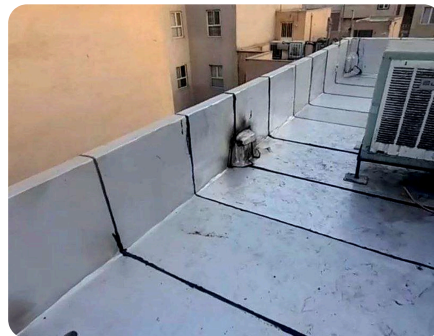

Prime coat on the compacted base

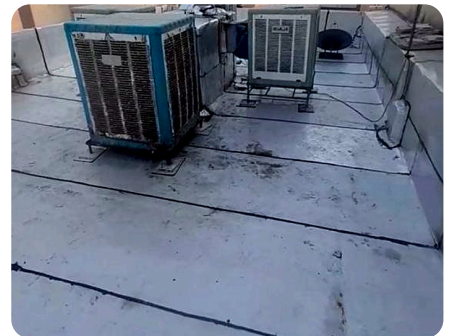

Site preparation with a skid-steer loader

Isogam with lapped, sealed seams

Membrane turned up the parapet

Waterproofing around AC unit bases
